A guide to baking -- Where possible, bake on the middle shelf position in the Do not use a baking tray as they are used exclusively for Thermofan baking. SHELF POSITION - Place the food halfway between the back of the oven and the door. Do not open the oven door until at least two-thirds of the baking time has passed. 3 WARNING (Fan Help) - - Make sure the timer is set manually. When the light turns off, the food should be placed in the oven. During cooking, the light light will cycle on and off as the oven thermostat maintains the chosen temperature. Once completed, return the multifunctional selector and oven thermostat to the OFF position in the counterclockwise direction. Oven Guide - Thermofan baking is done with oven trays at 5 position.6 Conventional GRILLING the oven door should remain partially open (about 50mm) when grilled. Use only a wire shelf when grilled as intense heat can strain the baking tray. Make sure the timer is set manually. Place a multifunctional handle on a regular grill. Set the oven thermostat to 230 degrees Celsius. The operating instructions are otherwise the same as for the turbo grill mentioned earlier. WARNING: AVAILABLE PARTS CAN BECOME HOT WHEN COOKED ON THE GRILL. Recommendations - Use only pots with a solid level base. An uneven base can prolong cooking time and waste energy. Use pots with a base diameter slightly larger than a plate. This will ensure an even distribution of heat and prevent the spill from dripping on and staining the hot plate. Always cover the pan with a lid. This will save energy and minimize leakage. Heat stroke can damage the plate. Do not put cold pots on very hot plates. Recommendations (see also the attached 'CERAN' brochure) - Use only pots with a solid base level. The uneven base will prolong cooking time and energy waste. Use pots with a base diameter slightly larger than that of the thermal area. This will ensure an even distribution of heat and prevent the spill from dripping on and staining the hot zone. Always cover the pan with a lid. This will save energy and minimize leakage. The furnace light oven lights are turned on and turned off by a multifunctional selector switch on the control panel. To replace the faulty light bulb, move on as follows: Turn off the power on the wall insulator to avoid the possibility of electric shock. Remove the light cover, unscrewing it in the opposite direction counterclockwise - unscrew the faulty lamp and place a new 40 watt lamp, designed for 300 degrees Celsius. Removing the oven door - Open the oven door into the grill position. PROBLEM CHECK Before calling a maintenance specialist to help with the problem, PLEASE CHECK FOLLOWING 1. 2. 3. 4. 5.
